SUMMARY

Cloud and DevOps Engineer with 2+ years of combined experience in software development, cloud support, and IT operations. Hands-on experience with AWS, Terraform, Docker, Kubernetes, GitHub Actions, Linux, Prometheus, and Grafana. Skilled in infrastructure automation, CI/CD, cloud monitoring, troubleshooting, and secure cloud configuration.

EDUCATION

Texas A&M University – Kingsville, Kingsville, Texas, US	August 2024 - May 2026
Master of Engineering in Computer Science	GPA: 3.90
Gujarat Technological University, India	August 2018 - May 2022
Bachelor of Engineering in Information Technology	GPA: 3.57

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, VPC, IAM, EKS, ECR, CloudWatch, CloudTrail), Azure, Azure Monitor, Log Analytics, Application Insights

Operations: Incident Triage, Root Cause Analysis, Production Support, Runbooks, Operational Readiness

Infrastructure & GitOps: Terraform, Helm, Argo CD

CI/CD & Version Control: Git, GitHub, GitHub Actions, CI/CD Pipelines

Containers & Orchestration: Docker, Kubernetes, Argo Rollouts

Monitoring & Observability: Prometheus, Splunk, CloudWatch, CloudTrail, Prometheus, Grafana, OpenTelemetry.

Programming & Scripting: Python, Bash, YAML, JSON, REST APIs

AI-Assisted Automation: OpenAI API, Prompt Engineering, Structured Outputs

Systems, Networking & Security: Linux, TCP/IP, DNS, HTTP/HTTPS, GitHub OIDC, IAM Least Privilege, Wireshark, Nmap

PROFESSIONAL EXPERIENCE

Frontend Developer Ultron Technologies (India)	May 2023 - June 2024
- Developed and maintained an e-commerce application using HTML, CSS, JavaScript, Bootstrap, and WordPress. - Improved application performance by 40% through code refactoring, lazy loading, caching, and frontend optimization. - Collaborated with UI/UX designers and backend developers to deliver responsive features, increasing organic traffic by 25% and user retention by 32%.	
Cloud & Security Support Intern - Remote Pantech Solutions (India)	November 2023 - January 2024
- Configured and supported AWS resources, including EC2, S3, VPC, IAM, CloudWatch, CloudTrail, and Security Groups. - Troubleshoot cloud connectivity, IAM permissions, network configurations, and AWS resource issues while documenting findings and recommended solutions. - Analyzed cloud activity and network traffic using CloudWatch, CloudTrail, Wireshark, and Nmap, improving troubleshooting efficiency by 22%.	
Computer Science Instructor Console Computers (India)	June 2022 - April 2023
- Delivered hands-on instruction in operating systems, networking, cybersecurity, algorithms, HTML, CSS, JavaScript, and Microsoft Office. - Maintained classroom computer systems and resolved hardware, software, user-access, and internet-connectivity issues to support uninterrupted lab operations.	
Full-Stack Developer Intern TechnoGuide InfoSoft Pvt. Ltd. (India)	January 2022 - April 2022
Developed a Python and Django web application with online ordering, secure payment functionality,	

and administrative features, increasing online orders by 40%.

- Built an inventory and order-management system for real-time stock tracking and order processing, reducing inventory discrepancies by 30%.

PROJECTS

Production-Ready AWS EKS Platform with Terraform & GitOps

[Github](#)

- Designed and provisioned a multi-AZ AWS environment using Terraform with VPC, public/private subnets, NAT Gateway, Application Load Balancer, EKS, ECR, IAM, and security groups.
- Containerized an application with Docker and deployed it to Amazon EKS using Kubernetes manifests and Helm charts.
- Implemented GitOps based continuous deployment using Argo CD and GitHub Actions, enabling automated image builds, ECR publishing, and Kubernetes deployments.
- Configured Kubernetes health probes, resource requests/limits, autoscaling, rolling updates, and ingress-based traffic routing.
- Integrated Prometheus, Grafana, and CloudWatch for infrastructure and application monitoring, alerting, and troubleshooting.
- Used GitHub OIDC and IAM least-privilege policies to provide CI/CD pipelines short-lived AWS credentials without storing long-term access keys.

AI-Powered Terraform Change Guardian

[Github](#)

- Built a Python-based tool that analyzes Terraform plan JSON to detect destructive changes, publicly exposed resources, excessive IAM permissions, missing encryption, and untagged resources.
- Developed a risk-scoring system that assigns severity levels and uses an AI API to generate explanations, potential impact, and recommended fixes.
- Integrated GitHub Actions with GitHub OIDC and short-lived AWS credentials to publish pull-request risk reports and require approval for high-risk changes.

AI-Assisted Incident Investigation and Recovery Platform

[Github](#)

- Built an incident investigation platform that collects application logs, Linux system events, container status, deployment history, and performance metrics.
- Developed a Python service that correlates errors, container restarts, HTTP failures, and deployment changes to identify probable root causes and generate AI-assisted incident summaries.
- Created Prometheus alerts and Grafana dashboards and implemented an approval-based recovery workflow with automated health checks.

Intelligent Canary Deployment and Automated Rollback System

[Github](#)

- Designed a Kubernetes-based canary deployment workflow that gradually routes traffic to new application versions while monitoring availability, HTTP error rates, latency, and container health.
- Configured Argo Rollouts and Prometheus analysis templates to automatically pause or roll back deployments when application performance exceeded defined failure thresholds.
- Developed a GitHub Actions pipeline to test application code, build and publish Docker images, update Kubernetes manifests, and initiate controlled canary releases.
- Added automated post-deployment validation and AI-generated explanations describing why a rollout succeeded, paused, or rolled back based on observed metrics.
- Tested successful and failed deployment scenarios and documented traffic progression, rollback behavior, health-check results, and troubleshooting procedures.

CERTIFICATIONS & TRAINING

- Red Hat Certified System Administrator (RHCSA) (Earned - 2016)
- Google Cybersecurity Professional Certificate
- AWS Cloud Practitioner Essentials
- TryHackMe Pre Security
- TryHackMe AI Security
- Star Cyber Secure User (SCSU)
- Terraform: The Complete Guide - Udemy
